Est. 1919

are proud to offer

From the
Anvil[®]

Door & Window Furniture

the collection.

Ironmongery is an everyday essential. While it may seem like a small or final detail, the right choice of door and window furniture can totally transform the look, feel, and functionality of any property! This hardware offering has been hand-forged from solid brass, solid bronze, mild steel and marine-grade stainless steel to provide longevity and uniqueness in each piece.

the finishes.

AGED BRASS

FOR INTERNAL & EXTERNAL USE

The Aged Brass products are made from solid unlacquered brass, offering an abundance of character and charm. This finish is perfectly suited to period dwellings and will create a statement throughout. Due to the accelerated ageing process this finish undergoes, a darker patina gathers around the edges and recesses to contrast beautifully with the re-polished surface areas. This finish will continue to oxidise and age as it is an unlacquered finish, meaning the finish will darken over time.

AGED BRONZE

FOR INTERNAL & EXTERNAL USE

The Aged Bronze products are manufactured from solid bronze containing a minimum of 85% copper. Due to the process used to age the metal, this finish is very dark and has a rich, matt appearance. During the final stages of manufacturing, a durable, matt lacquer is applied to this finish which helps preserve its distinctive tones.

ANTIQUÉ PEWTER

FOR INTERNAL & EXTERNAL USE

The Antique Pewter finish is the result of a complex process applied to solid brass, offering an attractive alternative to Pewter Patina. As this finish is applied to brass rather than steel, it has fewer textural marks making it smoother than the Pewter Patina finish.

BEESWAX

FOR INTERNAL USE ONLY

The Beeswax finish is the most authentic finish for steel. After forging, the colours left in the steel range from blue to deep red ochre. To preserve these beautiful colours, the Beeswax products are dipped into hot beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when the products are fitted internally and properly maintained. An extremely natural finish and a far softer alternative to a black powder coated finish.

BLACK

FOR INTERNAL & EXTERNAL USE

The Black finish is a popular choice in traditional settings, it has a subtle sheen and offers a bold contrast on both stained and painted timber alike. It is baked in a high-temperature oven giving it durable corrosion resistant properties. This finish is extremely low maintenance and perfect for use in bathrooms, kitchens or externally where damper environmental conditions are expected.

EXTERNAL BEESWAX

FOR INTERNAL & EXTERNAL USE

The External Beeswax is unique to From The Anvil and is manufactured from an anti-corrosive beeswax. It has a matt richness and like the standard Beeswax, the depth of colour ranges from blue to deep red ochre. An extremely natural finish and a far softer alternative to a black powder coated finish.

MATT BLACK
FOR INTERNAL & EXTERNAL USE

The refined Matt Black finish has a distinct contemporary feel. Naturally, it looks great in ultra-modern interiors, but this versatile finish is timeless and will create a sophisticated statement in traditional or more rustic settings too. The Matt Black finish is applied to a base material of solid steel and then baked in a high temperature oven, resulting in a subtle black patina that emphasises the product's clean silhouette.

POLISHED BRONZE
FOR INTERNAL & EXTERNAL USE

Manufactured from solid bronze containing a minimum of 85% copper. This Polished Bronze finish is firstly aged and then re-polished, which creates a subtle contrast between the lighter surface areas and the darker detailed areas of each product. To preserve the bright contrast of this finish, we apply a robust lacquer at the final stages of manufacturing. A perfect choice for both contemporary and traditional settings.

PEWTER PATINA
FOR INTERNAL & EXTERNAL USE

The Pewter Patina finish is forged from a durable base of steel and is a fine example of how the unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes but also offers a contemporary alternative in more modern settings.

POLISHED CHROME
FOR INTERNAL & EXTERNAL USE

The Polished Chrome products are made from a base metal of solid brass with a high quality chrome plating applied to the surface. A high sheen finish that is most commonly used in contemporary settings. This finish offers bright, bold and reflective qualities which work best if a clean, cool look is desired.

POLISHED BRASS
FOR INTERNAL & EXTERNAL USE

Made from solid unlacquered brass, this finish is both classic and simplistic and offers great possibilities for stately and period dwellings alike, particularly where a very traditional look is desired. When fully polished this finish has a depth of reflection. However, as the product is unlacquered this can also be left to age naturally, which over time will create a beautifully historic finish. As the Polished Brass is unlacquered, it will naturally age through oxidation, giving the product added character.

POLISHED MARINE SS (316)
FOR INTERNAL & EXTERNAL USE

The Polished Marine Stainless Steel is grade 316 and manufactured with high concentrations of chromium and nickel. This finish has extremely resilient corrosion resistant properties, exceeding 1000+ hours salt testing. An excellent choice for coastal locations or polluted environments, where a high sheen look is desired.

POLISHED NICKEL
FOR INTERNAL & EXTERNAL USE

The Polished Nickel finish is a high-quality plating applied to solid brass. This finish is bright, reflective and extremely versatile. It is very well suited to modern properties but equally matched to traditional settings due to the warm, calm tones. As the nickel finish is made using only one plating on brass, it offers a subtle warmth that cannot be replicated by more modern chrome finishes.

SATIN BRASS
FOR INTERNAL & EXTERNAL USE

The Satin Brass products are made from solid brass. During the final stages of manufacturing, the Satin Brass products are brushed with a satin wheel to give them their distinctive appearance. A high-quality matt lacquer is then applied to their surface for protection.

SATIN CHROME
FOR INTERNAL & EXTERNAL USE

Satin Chrome is created from a base metal of solid brass with a quality chrome plating applied to its surface. Satin Chrome offers an understated alternative to Polished Chrome. Its blue traces and less reflective appearance make this finish popular with those who wish to select a matt finish.

SATIN MARINE SS (316)
FOR INTERNAL & EXTERNAL USE

The Satin Marine Stainless Steel is grade 316 and manufactured with high concentrations of chromium and nickel. This finish has extremely resilient corrosion resistant properties, exceeding 1000+ hours salt testing. An excellent choice for coastal locations or polluted environments, where a low sheen, matt look is desired.

Maintenance & Care

The products offer excellent anti-corrosive properties and will last a lifetime if properly maintained.

We recommend avoiding the use of most of the ironmongery externally in coastal areas due to the high levels of atmospheric salt which will rust or tarnish most of our finishes. The only finishes suitable for use in these environments is the Marine Grade 316 Stainless Steel products which have been rigorously salt tested to withstand these harsh coastal conditions.

Please ensure any newly plastered or painted rooms are fully cured before fitting your ironmongery, as the high moisture may tarnish or rust some finishes.

When decorating, we recommend removing ironmongery prior to painting, staining, or plastering, and only returning fittings once the area has been fully cured.

Please avoid using any form of chemical cleaner, e.g. oxalic acid or aerosol sprays to clean products as these can permanently damage the finish.

Multipoint Lever Handles

These stylish espagnolette door handles are crafted from the finest quality materials and have been designed with longevity in mind.

The ergonomic shapes ensure ease of use, and the varying designs will complement traditional or contemporary entrance doors beautifully.
